

Quality Policy

ACOR is committed to providing best practice consulting engineering services in a creative and innovative manner. To confirm that this goal is achieved, we have established an Integrated Management System consistent with AS/NZS ISO 9001:2016 to provide our clients with the assurance that the services provided by ACOR will meet current and future service expectations.

The objective of this Policy is to consistently deliver superior outputs to clients while continually improving our processes. Quality management processes have been developed and embedded into the business to maintain a high level of customer satisfaction.

Through specific resources, systems, communication and training programs, all stakeholders, including any relevant interested parties have gained a sound understanding of this policy and our quality management system.

This policy is established, implemented, and maintained by the leadership team who confirms it is appropriate to the purpose and context of ACOR in supporting our strategic directions and risk profile.

A handwritten signature in black ink, appearing to read 'Nick Kokolis', positioned above the printed name.
